

School Case Study

BUILDING HOPE INCUBATOR SITE, Washington DC

This case study provides background on the school, technology needs of the school and accomplishments after we were brought on as a technology partner.

BACKGROUND

- Type: Early Childhood, Elementary, Middle
- Locations: 1

NEEDS

BUILDING HOPE INCUBATOR SITE needed technology assistance on day to day IT management issues and project management. Some of the issues they were facing:

- Issue 1: Required a better phone/data network at the school
- Issue 2: Needed a new phone system to support two schools with 45 extensions.
- Issue 3: Needed an intercom system to work in conjunction with the phone system.
- Issue 4: Needed a technology assessment of a new school building that was purchased. This assessment was needed so the school was assured that the building could support all technology initiatives.

ACCOMPLISHMENTS

- Issue 1: Managed and setup phone system in support for two schools. This included the phone/data cabling for both floors of the site.
- Issue 3: Setup intercom system to work in conjunction with phone system.
- Issue 4: Worked with architects and builders to make sure new building will support technology initiatives.
