

School Case Study

DC PREPARATORY ACADEMY, Washington DC

This case study provides background on the school, technology needs of the school and accomplishments after we were brought on as a technology partner.

BACKGROUND

- Students: 278
- Founded: 2003
- Type: Early Childhood, Elementary, Middle
- Locations: 3

NEEDS

DC PREPARATORY ACADEMY needed technology assistance on day to day IT management issues and project management. Some of the issues they were facing:

- Issue 1: They did not have a centrally housed email system.
- Issue 2: The headquarters office could not access the network at the school location.
- Issue 3: Needed strategic and technology guidance on setting up additional remote locations.

ACCOMPLISHMENTS

- Issue 1: Implemented school wide email system that included 3 locations.
- Issue 2: Set up a VPN and Wide Area Network allowing the headquarters to have access to the school location.
- Issue 3: Setup 2 site locations and integrated them into the wide area network.
