

School Case Study

SEPTIMA CLARK PCS, Washington DC

This case study provides background on the school, technology needs of the school and accomplishments after we were brought on as a technology partner.

BACKGROUND

- Students: 106
- Founded: 2005
- Type: Elementary
- Locations: 1

NEEDS

SEPTIMA CLARK PCS needed technology assistance on day to day IT management issues and project management. Some of the issues they were facing:

- Issue 1: Needed project management assistance with setting up network and phone at a new location
- Issue 2: Did not have a time management system that could track time in, time out, vacation, etc for staff.

ACCOMPLISHMENTS

- Issue 1: Managed projects that included setting up network and phone cabling for the main location and new location.
- Issue 2: Selected and implemented a biometric time clock solution to control time punches and organize time management.
